the "MADE IN ITALY" at the service of your house and garden since 1963

Manufacturer in Campomorone - Genoa - Italy: a small Italian manufacturing industry open to the world. Our rootedness in the territory is historical and testifies to the authenticity of our **Made in Italy**.

We take advantage of our technical skills in the design and construction of the moulds, as well as in the automation solutions of the assemblies.

Particularly focused on market needs, we offer:

HOUSEHOLD GOODS: **Blue Line**, a wide range of items, a new concept of tap sprayer spread all over the world.

GARDENING HOBBY: **Green Line**, developed from the first plastic quick connector in the world, helping those who take care of plants, flowers, and vegetables, in support of a healthy lifestyle.

The approach to market and customer is focused on utility and effectiveness: **providing practical solutions to real problems**. Innovating items, but always with a design based on the best user experience.

The 100% Italian craftsmanship, combined with technological updating, has shaped **our raison d'être: "to design, create and sell simplicity"**.

That's why our Made in Italy is authentic and the Siroflex brand is equal to attention to the end user and his daily needs.

We make the value of our experience available in our "honest" products because they keep their promises at a fair price.

All of this all over the world: today we register our presence in **42 countries**.

It's not all: despite that Siroflex internationalisation dates back to its origin, our will to assert our "Made in Italy" even in those countries we haven't reached yet, is still strong.

SIROFLEX®

water, our most precious resource

GARDEN IRRIGATION

Siroflex offers a complete range of fittings, hose trolleys, garden hoses, a complete selection of above ground sprinklers and, for the most diverse requirements, different types of water sprays:

- > AERATOR-SHOWER
- > SHOWER
- > LONG-RANGE
- > MULTIFUNCTION
- > WITH OR WITHOUT ON/OFF FLOW CONTROL LEVER

Siroflex irrigation systems have been designed and manufactured at our factory in Genoa since 1963.

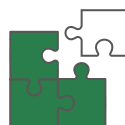

MADE IN ITALY

Design, production and packaging are 100% "Made in Italy" and each of our articles bears the Siroflex brand.

HIGH-QUALITY PRODUCTS

The accuracy of the production process and the choice of raw materials and components guarantee a consistent quality and a high wear resistance of the products.

COMPATIBILITY WITH OTHER BRANDS

Siroflex follows the worldwide standard: our fittings are compatible with all other above-ground irrigation systems.

6 STANDARD PROGRAMME above-ground garden irrigation

It encloses our complete collection used in mobile and surface irrigation. From tap connectors and quick connectors to garden hoses, from nozzles to shower and pistol grip sprays.

34 ELECTRONIC TIMER FOR AUTOMATIC IRRIGATION

It solves the problem of automatic irrigation of terraces, vegetable gardens and greenhouses.

36 CAPILLARY WATERING SYSTEM

Easy to assemble, economic and functional system, designed and manufactured to solve every technical problem for both professional or "do-it-yourself" installers.

The only one projected following a modular standard.

40 UNDERGROUND IRRIGATION

It is suitable for medium size plants to be installed by professionals but also in case of "do-it-yourself" watering. Easy to assemble thanks to a small number of 25 mm diameter connectors and pop-up sprinklers.

42 AUTOMATIC WATERING KITS FOR BALCONIES

They solve the problem of watering plants on a balcony (without direct water and electricity supply) in the absence of the user.

SIROFLEX®

STANDARD PROGRAMME

above-ground garden irrigation

It encloses our complete collection used in mobile and surface irrigation.

From tap connectors and quick connectors to garden hoses, from nozzles to shower and pistol grip sprays, from fixed sprinklers to mobile ones, from pulsating sprinklers to oscillating ones, from hose trolleys to portable and wall mounted hose reels, from garden shower to car wash brushes.

THREE WAY MANIFOLD

art. 4520
This 3 way manifold is provided with 3 individual taps and a 3/4" female cap which allows the plugging of the middle outlet.
This unique design, which is compact and functional, provides the option of three separate and adjustable watering outlets in one unit.

GARDEN AND HOUSE KITS

KIT 4429/S - CONNECTION "KITCHEN/BATHROOM"

**FOR STANDARD
THREADED TAPS
22x1M (EXTERNAL)
24x1F (INTERNAL)**

COMPONENTS

- 1 quick connector chromed/black 22x1 female
- 1 22x1 male - 24x1 male adaptor
- 1 chromed aerator-shower tap sprayer with male coupling
- 1 male coupling with hose grip Ø 20 (1/2" - 5/8")

You can easily fit our quick connector **to your kitchen or bath tap**, solving the problem of **connecting a hose for watering your plants outside** (balcony, terrace, garden).

Connecting our aerator-shower you can use your tap regularly.

KIT 4429/5S - CONNECTION "GARDEN/KITCHEN/BATHROOM"

**FOR STANDARD
THREADED TAPS
3/4" M (EXTERNAL)
22x1 M (EXTERNAL)
24x1 F (INTERNAL)**

COMPONENTS

- 1 quick connector chromed/black 3/4" female
- 1 3/4" male 22x1 female adaptor
- 1 22x1 male 24x1 male adaptor
- 1 chromed aerator-shower tap sprayer with swivel and male coupling
- 1 male coupling with hose grip Ø 20 (1/2" - 5/8")
- 1 quick connector with valve and hose grip Ø 20 (1/2" - 5/8")
- 1 nozzle with male coupling

You can easily fit our quick connector **to your garden, kitchen or bathroom tap**, solving the problem of **connecting a hose for watering your plants or washing outside** (balcony, terrace, garden) using the nozzle.

Connecting our aerator-shower you can use your tap regularly.

FOR STANDARD THREADED TAPS 22x1M (EXTERNAL) 24x1F (INTERNAL)

HOME: TAP SPRAYER + HAND SHOWER

GARDEN: HAND SHOWER + NOZZLE FOR GARDEN HOSE

COMPONENTS

- 1 quick connector with adaptor for taps with thread 22x1 male (external) or 24x1 female (internal)
- 1 aerator-shower tap sprayer with swivel and male coupling
- 1 PVC flexible hose m 1,50 with male coupling
- 1 Micronette Regal hair-wash hand shower with aerator-shower and total closure
- 1 hanger for Micronette Regal
- 1 male coupling with hose grip Ø 20 (1/2" - 5/8")
- 1 quick connector with valve and hose grip Ø 20 (1/2" - 5/8")
- 1 nozzle with male coupling

With our kit you can use your **house tap** with several functions.

At **home:** fit the quick connector to use easily, with a simple click, the Sirius aerator-shower, or the Micronette hand shower.

Moreover, you can connect a garden hose and use the same water outside (garden but also yard, terrace, balcony).

Outside: you can connect the hand shower to the garden hose (i.e. to wash your pet with hot water), or connect the nozzle to water or to clean the paving (such as to clean the paving, the car or a scooter).

KIT 4428/S - "GARDEN" CONNECTION

FOR STANDARD THREADED TAPS 3/4" M (EXTERNAL)

COMPONENTS

- 1 quick connector 3/4" female
- 1 aerator-shower tap sprayer with male coupling
- 1 male coupling with hose grip Ø 20 (1/2" - 5/8")

You can easily fit our quick connector to your garden tap, solving the problem of connecting a hose for watering your plants or washing outside (such as to clean the paving, the car or a bike).

Connecting our aerator-shower you can use your tap regularly.

AERATOR-SHOWER - SPRAY SET 4760/AS FOR "GARDEN" TAPS

WITH EXTERNAL STANDARD THREAD 3/4" M AND 1/2" M

COMPONENTS

- 1 tap connector 3/4" female
- 1 3/4" male - 1/2" female adaptor
- 2 quick connectors with hose grip Ø 20 mm (1/2" - 5/8")
- 1 aerator-shower-spray with tap and male coupling

Simple and economic set for watering flower beds, garden pots, plants on terraces and balconies, crops in vegetable gardens and greenhouses.

Connect the garden hose to the tap and, at the other side, the aerator-shower-spray. It has a ball valve to regulate the flow till its total closure to go from a pot to another without wetting the floor, it also has two functions: **aerator (soft spray)**, essential to water plants in pot without turning over the soil, that can be further sweetened thanks to the tap; **shower (to rain watering)**, pulling forward/lowering the aerator collar you have a shower useful to spray the leaves and that can be regulated through the use of the tap.

NOZZLE SET 4550/AS - FOR "GARDEN" TAPS

WITH EXTERNAL STANDARD THREAD 3/4" M AND 1/2" M

COMPONENTS

- 1 tap connector 3/4" female
- 1 3/4" male - 1/2" female adaptor
- 2 quick connectors with hose grip Ø 20 mm (1/2" - 5/8")
- 1 nozzle with male coupling

Simple and economic set for garden and vegetable garden watering and to wash your car, bike, camper, and paving: connect the garden hose to the tap and, at the other side, the nozzle to regulate the flow.

MULTI-USE SPRAY WITH PISTOL GRIP - 4615/AS - FOR "GARDEN" TAPS

**WITH EXTERNAL STANDARD
THREAD 3/4" M AND 1/2" M**

COMPONENTS

- 1 tap connector 3/4" female
- 1 3/4" male
1/2" female adaptor
- 2 quick hose connectors with
hose grip Ø 20 mm (1/2" - 5/8")
- 1 pistol grip with quick
connector and male coupling
- 1 shower spray with male
coupling
- 1 aerator-shower-spray
with male coupling
- 1 nozzle with male coupling

Versatile and economic set, thanks to the possibility of changing the different end parts from shower-spray to aerator-shower-spray (2 functions) and nozzle (adjustable flow), offers 5 different ways of watering, to satisfy different needs of lawns, flower beds, vegetable gardens, terraces, greenhouses and balconies.

Connect the garden hose to the tap and, at the other side, the pistol grip with flow switch which enables to move from a watering point to another without wetting the ground in the middle, with no water waste and with no need to turn the tap off.

Depending on your needs, you can connect the spray or the nozzle supplied to the pistol grip: to water your garden, your plants in pots, your vegetable garden or to clean something (such as pavement or car) in the best way.

SIROFLEX®

5500 ELECTRONIC TIMER

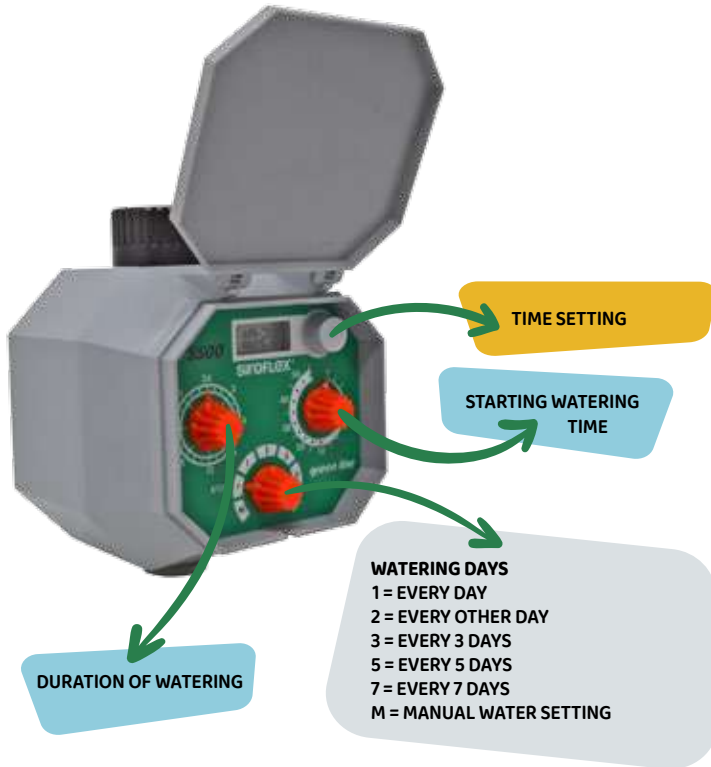

**terraces, vegetable gardens,
gardens and greenhouses**

It makes automatic watering easy for your plants on terraces, vegetable gardens, gardens and greenhouses with:

- easy programming - you have only to choose day, hour and how much the watering should last through 3 control knobs;
- advanced technology which guarantees total automation, maximum precision and long lasting;
- it works perfectly both at low and high water pressure.

ELECTRONIC TIMER 5500

FEATURES

- Liquid crystal clock
- Can be used, once and for 1 to 55 minutes, every day, every other day, every 3, 5, 7 days
- Powered with a 9V alkaline battery
- Low consumption microprocessor
- It works at pressure from 0 to 8 bar
- It can work "manually" without deleting its memory
- Inlet and outlet 3/4" thread

SIROFLEX®

CAPILLARY WATERING SYSTEM

terraces, flowerbeds, vegetable gardens and greenhouses

Capillary watering system with module distributor for terraces, flowerbed, vegetable gardens and greenhouses.

It waters each plant to the base to reach straight the roots, saving water.

It helps you to avoid problems caused from over watering (too much weeds and insects) and reduces water evaporation.

COMPONENTS

art. 5050
PVC rigid pipe mt 2,50 length,
external Ø 20 mms

art. 5053
pipe clip Ø 20

art. 5055
3/4" female connection
for Ø 20 pipes

art. 6050
joint with a retractable
turning nut:
3/4" female, 3/4" male

art. 5060
90° "T" junction for Ø 20 pipes

art. 5065
90° elbow for Ø 20 pipes

art. 5066
135° elbow for Ø 20 pipes

art. 5070
Ø 20 pipe mender

art. 5074
end cap for Ø 20 pipes

art. 5075
Ø 20 - 3/4" male adapter
with screen washer

art. 5001
module distributor
3/4" female
3/4" male
with 2 taps

art. 5035
3/4" female cap
for module distributor

art. 5010
mini-sprinkler on spike

SIROFLEX®

UNDERGROUND WATERING SYSTEM

green areas

It's useful for building small watering systems, suitable for both gardeners and do-it-yourselfers.

Few 25 mm. diameter fittings and pop-up sprinklers make it easy to install.

COMPONENTS

art. 6050
joint with a retractable
turning nut:
3/4" Female
3/4" male

art. 6055
3/4" Female connection
for Ø 25 pipes

art. 6060
90° "T" junction for Ø 25 pipes

SIROFLEX®

AUTOMATIC WATERING KITS

for balconies and terraces

They solve the problem of watering plants on a balcony (without direct water and electricity supply) in the absence of the user.

They are available in two versions: for a maximum of 20 pots (Art.5200) and for a maximum of 40 pots (Art.5250).

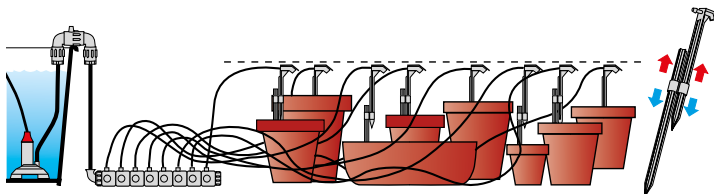

KIT 5200 FOR 20 POTS

KIT CONTENTS

- 1 battery-operated twilight electronic programmer 5700 (N°8 - AA - LR6 - 1,5 V alkaline batteries), batteries lifespan: approx. 40 days
- 1 12 V submerged electric pump
- 1 meter black hose Ø mm 10x13
- 1 anti-siphon valve equipped with elbows and hose connectors
- 10 module distributors with 2 connections each for mini-sprinklers on spike
- 1 3/4" female cap - 1 niple - 1 small black nut cap
- 1 angled stem with nut
- 40 m. black capillary hose Ø mm 4x6 (20 hoses m. 2 each)
- 20 mini-sprinklers on spike
- 10 mini-sprinkler extensions
- 10 double rings for mini-sprinkler extensions
- 5 flow regulators

DAILY WATER QUANTITY

- with n. 20 mini-sprinklers = liters 2,20 approx.
- with n. 15 mini-sprinklers = liters 2,00 approx.
- with n. 10 mini-sprinklers = liters 1,75 approx.

30 DAYS TANK CAPACITY*

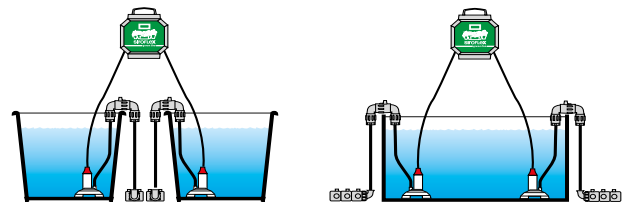

- liters 80 approx.
- liters 75 approx.
- liters 65 approx.

KIT 5250 FOR 40 POTS

KIT CONTENTS

- 1 battery-operated twilight electronic programmer 5705 (N°8 - C - LR14 - 1,5 V alkaline batteries), batteries lifespan: approx. 40 days
- 2 12 V submerged electric pumps
- 2 meters black hose Ø mm 10x13
- 2 anti-siphon valves equipped with elbows and hose connectors
- 20 module distributors with 2 connections each for mini-sprinklers on spike
- 2 3/4" female caps - 2 niple - 2 small black nut caps
- 2 angled stems with nut
- 80 m. black capillary hose Ø mm 4x6 (40 hoses m. 2 each)
- 40 mini-sprinklers on spike
- 20 mini-sprinkler extensions
- 20 double rings for mini-sprinkler extensions
- 10 flow regulators

DAILY WATER QUANTITY

- with n. 40 mini-sprinklers = liters 4,50 approx.
- with n. 30 mini-sprinklers = liters 4,00 approx.

30 DAYS TANK CAPACITY*

- liters 80 approx. x 2
- liters 75 approx. x 2

*The capacity of the tanks, which takes into account possible fluctuations in consumption and other phenomena such as evaporation, should in any case be considered as indicative and minimum essential.

born in Genoa in 1963

producing in Valpolcevera since 1974
